

# Friedrich Ritter (1898-1989)

## Ritter's diaries (Die Ritter Tagebücher)

© Under copyright (with permission of DKG)

*Kakteen in Südamerika* was written on the basis of the field notes of Ritter. These notes were written in a series of diaries that are proposed below. The first file presents a table of contents in German, the next files are the diaries. Most of the diaries were numbered consecutively by Ritter along the years. Some supplementary files, above 74, have been numbered arbitrarily; they contain various data like tables of contents of previous diaries, FR numbers, details about visited countries, etc.

These diaries provide some useful, new and personal informations that are not reported in [Kakteen in Südamerika](#).

# Kakteen in Südamerika

© Under copyright

This book is still under copyright. In spite of our efforts it has been impossible to find any right holder. The book is nevertheless proposed owing to its historical interest. A reprint is unlikely since Ritter published the book himself. However, if you can help solving the ownership problem, please [contact us](#).

Friedrich Ritter

## Kakteen in Südamerika

Band 1

The book was edited from 1979 to 1981. It is made of 4 volumes, 1692 pages and 1416 illustrations. Friedrich Ritter presents his extensive field work throughout South America and his point of view about cactus classification. Even though the latter is now out of date, the field data and plant descriptions (including many latin diagnoses) are of high interest. Unfortunately, the illustrations are of very bad quality, most in B&W (from color originals!), and they are thus of limited help <sup>1)</sup>

- Volume 4: [KaktSudam4\\_O.pdf](#) (111.2MB; 2010-10-03)

### Description of flower colors:

Ritter used the *Pflanzenfarben Atlas* of E. Biesalski to describe the colours accurately. The chart is based on the German standard DIN 6164. A colour is defined by 3 numbers T, S and D:

1. The hue, T (for *Farbton*) is the reference colour (from yellow to green through red and blue).
2. The saturation, S (for *Sättigung*) defines the "strength" of the colour. When S = 0, an image is in black & white.
3. The shadow (or darkness), D (for *Dunkelstufe*) defines the brightness. The higher D, the darker the colour (D = 9 is black).

The [DIN6164\\_A0.pdf](#) file gives a sample colour model and the associated T:S:D numbers.

## Die von Curt Backeberg in "Descriptiones Cactacearum novarum" veröffentlichten Diagnosen...

© Under copyright

This book is still under copyright. In spite of our efforts it has been impossible to find any right holder. The book is nevertheless proposed owing to its historical interest. A reprint is unlikely since Ritter published the book himself. However, if you can help solving the ownership problem, please [contact us](#).

This booklet was edited by Ritter in 1958. Ritter critically comments the "new descriptions" of Backeberg published in *Descriptiones Cactacearum novarum*. 54 pages of text (German), no picture.

- **Read online in the [reading room](#)**
- **Download :**
  - Original file <sup>2)</sup>: [Die\\_von\\_Curt\\_Backeberg\\_O.pdf](#) (36.9MB; 2016-07-27)

<sup>1)</sup>

The original illustrations should be reprinted, probably from Kew Gardens

<sup>2)</sup>

The file contains a "searchable" layer of interpreted text.
