Charles Darwin (1809-1882)

The power of movement in plants.

No copyright (public domain)

This book was issued on November 6, 1880 in England. This is “hard science” at the end of the author's life. Take a look at... the text only **because the 196 wood-engravings are lacking** [1].

The (interpreted) file was produced by the Gutenberg project. You will open it with any text editor (RTF format) after expanding the zip archive.

- Download archive (.zip) : Darwin_pwmvp11r.zip (376 KB; 2006-9-16)

You must comply with the rule of the Gutenberg project if you use this document.
(These rules are given in the file, and they can be found at the project Gutenberg web site)
