Die Kakteen

© Under copyright (with permission)

Many thanks to:

- **Hans Jörg Krainz** (author's son) and to **Julia Walther of Kosmos publishing Company** for their authorization to distribute this e-version.
- **Detlev Metzger** and **Rolf Märtinger** for their proofreading work.
- **Urs Egli** for help in preparing this e-version.

About 2000 pages were published by Krainz from 1966 to 1975, as periodic leaflets. Various authors such as Andreea, Buining, Buxbaum, Frank, Kladiwa participated in the work. It contains a lot of information although a part is now out of date.

The weight of the work explains why it is split into several files; besides an introduction that lumps together various leaflets and a heavy chapter devoted to cactus morphology by Buxbaum, the other files contain plants or genera the names of which begin with the same letter.

Eggl Index	Eggl-KrainzIndex.pdf (48.5Mo; 2019-09-04)	

The corrections issued along the years were taken into account in the interpreted files. Some of these are contradictory however. We were thus forced to take arbitrary decisions. The corrections are given in the “comment” layer as usual.
