

Pin — Simon

Thanks to **Ana Beatriz** and **Joan** for authorizing the online version of their book.

Guía ilustrada de los Cactus del Paraguay

© Under copyright (with permission)

This book has been published in 2004. It is 200 pages long and written in Spanish. It is a concise presentation of the Paraguayan cacti with many illustrations. After an exhaustive introduction (55 pages), the cacti are presented and commented in alphabetic order. A rough distribution map accompanies each genus. Technical details (glossary of botanical terms, bibliographic references, synonyms...) are in specific appendices at the end of the book. The authors are briefly introduced on the inner back cover.

Remark: we have been fortunate enough to recover and use the original PageMaker files. This gave us the opportunity to make some minor corrections with respect to the original printed edition of 2004.
